 - <u>* jackson-annotations, jackson-core, jackson-databind 파일 다운로드</u>
 - 1. HTTP 메소드 GET / POST
 - 2. HTTP Header
 - 3. 카카오 개발자 사이트 가입 / 로그인 / API 문서
 - 4. 웹 브라우저 확장 프로그램 설치 (Json Formatter / API Tester)
 - 5. ObjectMapper 라이브러리 사용법

1. HTTP 메소드 GET / POST

1. HTTP 메소드 GET / POST

```
String apiURL = "http://ggoreb.com/http/get/";
apiURL += "?page=1";

URL url = new URL(apiURL);
HttpURLConnection con = (HttpURLConnection) url.openConnection();

BufferedReader br = new BufferedReader(
    new InputStreamReader(con.getInputStream(), "utf-8"));

while(true) {
    String data = br.readLine();
    if(data == null) break;
    System.out.println(data);
}
```

```
<html>
 <head>
   <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.1.3/dist/css/boo</pre>
   <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.1.3/dist/js/boo</pre>
 </head>
 <body>
   <div class="container mt-3">
     <h2>Pagination</h2>
     <h3>현재 페이지 번호 : 1</h3>
     <a class="page-link" href="./?page=1">1</a>
      <a class="page-link" href="./?page=2">2</a>
      <a class="page-link" href="./?page=3">3</a>
    </div>
 </body>
</html>
```

1. HTTP 메소드 GET / POST

```
String apiURL = "http://ggoreb.com/http/post/";
URL url = new URL(apiURL);
HttpURLConnection con = (HttpURLConnection) url.openConnection();
/* POST 설정 */
con.setRequestMethod("POST");
con.setDoOutput(true);
con.setDoInput(true);
OutputStream outputStream = con.getOutputStream();
PrintWriter writer = new PrintWriter(
    new OutputStreamWriter(outputStream, "UTF-8"), true);
writer.append("&page=3");
writer.flush();
BufferedReader br = new BufferedReader(
    new InputStreamReader(con.getInputStream(), "utf-8"));
while(true) {
 String data = br.readLine();
  if(data == null) break;
 System.out.println(data);
```

2. HTTP Header - 헤더값 지정 X

```
String apiURL = "http://ggoreb.com/http/request.jsp";

URL url = new URL(apiURL);
HttpURLConnection con = (HttpURLConnection)
url.openConnection();
```

```
method : GET<br>
